1

Why to register within EMITS?

ESA Member States have made it mandatory since April 2007 to fill out a detailed questionnaire

- To become an ESA potential tenderer
- To obtain a bidder code (**ESABD**) necessary to identify yourself when sending proposals to the Agency – it is a reference number, a primary key in ESA's corporate applications
- To receive a **login and password** to have access to ITTs detailed information package (Letter of Invitation, Statement of Work, Tender Conditions, Contract Conditions, Clarifications if any)
- To keep your ESABD and online information Valid and to avoid becoming Obsolete, Outdated or Not Valid, status restricting your access to opportunities
- To become an ESA supplier as this ESABD is indispensable for the contractual process to be initiated. You will then be granted a Supplier Code (SUP), an alpha code, enabling you to send e-invoices (EFIS) and payments to be made

☒ ESA has a powerful datawarehouse, interlinked corporate applications, you ease the information and moneys flow when you are properly registered

3

What's in there? Philosophy of the Registration System

- **1- Official Registration :** ESA wants to clearly identify space operators and only grants contracts to legally registered entities vis-à-vis their authorities (no sub-entities linked to legal entities).
- **2- General information:** properly filling out this section prevent entities to repeat too general information within their offer (sub-entities = establishments to be recorded here).
- **3- Contacts:** ESA needs to know who the Executives of companies / R&D centres are to enhance communication with space operators. The Agency wants to be sure to reach the right persons through permanently updated business cards (= a space Who's Who).
- **4- Activities /Projects /Products & Services:** ESA is offering entities the opportunity to make their own technology and expertise marketing. Project & Technical Officers can search for competences and identify potential suppliers.
- **5- Staff and Facilities:** enables ESA Executive & Member States to assess the personnel active in the space sector, its evolution and the availabilities of Tests Centres.
- **6- Key Financial Figures:** enables ESA Executive & Member States to assess the space market and its growth perspectives or difficulties to propose better solutions and programmes. ESA also needs to analyse the strength and sustainability of its suppliers.
- **7- Ownership /Subsidiaries:** necessary to identify the nationality of the entities (geo-return, operational control) and to assess entities' size (i.e. Large, Small, SME).
- **8- Bidder Information /EMITS Roles:** mention an Entity Information Administrator (EIA, assisted by Deputies) responsible for collecting internally data of quality, for filling out, for updating the questionnaire and for submitting it to ESA for validation. A Bidder Code Contact (= contractual responsible) is also mandatory. EMITS Users who can access detailed AO's information package have to be recorded here too. ESA is paying great attention to the security of EMITS accesses and offers the opportunity to express interest on ITTs.

4

In other words: what are the benefits of IO?

- A communication tool enabling permanent updating of the entities' contacts and of the accesses to EMITS
- A pre-qualification tool (i.e. credibility of tenderers)
- A marketing tool firstly within ESA secondly worldwide when so requested
- A market analysis tool (identification of competences and participation /involvement of entities)
- An ITTs access control tool (i.e. Member States, PECS, non MS) enabling a more structured access to the information published through EMITS
- A contributor to the procurement process (quicker assessment – quicker communication, dispense to provide some information within proposal TBC soon)
- A reference tool for the Finance (payment procedure and location)

Where do I start? <http://emits.esa.int>

- New Tenderers, "Entity Registration", receive a PIN number

Entity Registration

Entity Name * :

Entity Type * :

Country * :

If you have already saved information for Your Entity enter your PIN number to access it:

PIN Number

You have been assigned with this PIN Number: **27548958**.

Your PIN number is your security number that enables you to access your Entity saved data.

Please take note of it because You will be requested to enter it every time you want to access your Entity data.

Your PIN number is valid until your Entity is registered in EMITS

Your Entity Details

ESA

CZ Republic Presentation for Industry & Institutions 17/03/2009 7

What is the rationale of the system?

- Registration takes place at the level of LEGAL ENTITIES
- Questionnaire's sections are marked with a traffic light, the objective is to turn the 8 sections into green or yellow – red means something is missing – "Submit for Validation" at the end of the process
- Most fields are mandatory and are marked with a red star *, meaning data must be provided (open alpha or numeric fields / drop down menus / select "None" or "Enter" for a pop up window / documents to be uploaded / enter NA sometimes)

Activities *

Products & Services *

- "Save" every update before going back to "Main Screen" or "Close"
- Read pop up messages and proceed accordingly
- "Send Notification" to contact the service desk (ID / PW or IT problems)
- Updating can take some time, you need to go back to the updating area to see changes you have recorded but did not submit – Data is never lost!

The contents of the questionnaire

The entity information that is required depends on the Entity Type

- A) **Industrial Firm**
- B) **Service Firm**
- C) **Non-Profit Organisation**
- D) **Other**

- ✓ **General Information:** for all
 - Entity Identification
 - Official Registration
 - VAT & Social Security Numbers
 - Organisation chart
 - Establishments
- ✓ **Contacts:** for A, B and D
 - Chief Executive Officer
 - Chief Financial Officer
 - Space Business Manager
- ✓ **Contacts:** for C
 - Head of Institution / Dean
 - Head of Administration
 - Responsible for Space Activities

- ✓ **Activities / Projects / Products & Services** for all
- ✓ **Staff & Facilities** for all
- ✓ **Key Financial Figures** for all
- ✓ **Ownership / Subsidiaries:** for A, B and D
 - Structural Relations
 - Working Relations
 - Firm Shareholder
 - Subsidiary
- ✓ **Achievements** for C
 - Space Activities
 - Space Projects
 - Activities not related to Space
- ✓ **Bidder Information / EMITS Users and Roles**
 - Entity Information Administrator
 - Entity Information Administrator Deputy
 - Entity Information Reviewer
 - Entity Invoicing Administrator

Example of Questionnaires

Refer to your documentation

- Questionnaire for Industrial Firms
- Questionnaire for Research Organisations

Defining your entity's EMITS Roles

The **Entity Information Administrator (EIA)** can:

- Access and Update the Entity Information whenever necessary or when requested by ESA.
- Submit the Entity Information to ESA.
- Access published Entity Information.
- Update or Request EMITS Userid's for the Entity Staff and defining their Role.
- Request to add or remove ESA Bidder Codes for his/her Entity.

WARNING: If you update the Entity Information, you will remain the EIA until your Entity Information is submitted to ESA for validation.

An Entity Information Administrator needs to be assisted by one or more **Entity Information Administrator Deputies**. They have the same functions available as the Entity Information Administrator.

The Entity **Information Reviewer** can do the same as the Entity Information Administrator except submitting the Entity Information to ESA (s/he can help the EIA filling in parts of the Questionnaire).

The Entity **Invoicing Administrator** is the Entity Contact Point for financial and payment matters. He or she has the same access rights as an Entity Normal User.

The **Bidder Code Contact** is a contractual contact point, his/her name is used by the procurement Department, address must be in the country where the entity is registered

The **Tender Administrator** function is reserved to external entities who can upload ITTs in EMITS to select sub-contractors

The Entity **Normal User** can read the published Entity Information and read EMITS Tenders (Intended Invitations To Tender/Invitation To Tender) and optionally express interest for both (this can be defined by the Entity Information Administrator or its Deputy).

Are there Agency's tips to proceed smartly?

1. Read the support documentation on the Industry Portal first
2. Access the system and store your PIN number or ID / PW
3. Check your entity type
4. Click "View All" and print your questionnaire
5. Nominate an Entity Information Administrator (and Deputies)
6. Coordinate internally to collect data
7. Start filling in the e-questionnaire only when the data collection process is finished
8. Double check mandatory fields* when a section is still red and you think you did everything right
9. Contact appropriate desks if you are blocked
10. Don't forget to submit for validation every time this is needed
11. Pay attention to the Notifications you receive

More than 1700 entities have proceeded, you can do it!

What are the most common mistakes?

- To think your updating work is lost when looking at the View mode: you need to go to the updating area Edit mode
- To fill in only 2 fields for telephone & fax: 3 fields must be filled out (country code + area code + number)
- To forget to select "None" or NA when needed
- To enter duplicate business cards (the same person can cumulate roles, use "Ctrl+Enter")
- To forget to select or enter a Function on a business card
- To initiate registration 2 days before an ITT deadline
- To badly assess entity size (Large means you exceed all SME criteria, Small means you exceed two SME criteria)
- To avoid providing SME status required assessment data (SME = maximum 250 staff, €50m turnover, €43m balance sheet total) and that of partner and linked shareholders / subsidiaries
- To register at Institute / Laboratory / Department level when a Research Centres or University

What if I am a Large complex entity?

- = Large company with sister companies, business units and / or with establishments (premises, sites) that are not legally independent
 - = University/Research centre with lots of Institutes, Faculties, Laboratories, etc. some being legally independent others not.
 - Step 1: Choose an EIA for the whole entity
 - Step 2: Fill in sections 1, 2, 3, 5 & 6 for the main legal entity
 - Step 3: Choose EIAD(s) for sub-entities
 - Step 4: Enter n sub-entities in section 2 as establishments
 - Step 5: EIADs fill in section 4 by introducing the name of their respective establishment followed by the required descriptions
 - Step 6: EIADs enter the business cards of their EMITS normal users and other contacts as appropriate
- ⇒ You are already registered with multiple ESABDs, create new “clean” main record, sub-entities ESABD will be transferred to main entity
- ⇒ You are registering for the first time, create “clean” main record and contact us for the creation of an extra ESABD to be transferred to the main entity

Conclusion

- Registering as ESA Tenderer is a first mandatory step
- Czech Republic entities, as others, received a restricted access to EMITS information. Full access to the information is granted provided they are properly registered and their country is included in the provision list (optional programmes).
- EMITS is a reference tool enabling technology marketing, searches for competences and a high level of industrial relations & communication.
- IO contributes to fair competition and allows fair and equal access to the information pertaining to the ITTs in the course of the tendering period
- IO allows industry to organise themselves and SMEs to enter into alliances with the primes and other companies

Data provided are strictly confidential

Registration process

Not profit organisations (e.g. universities, research centres,
Ministries, Agencies)

- Simplified registration procedure. It means calling ESA-Mr Verdin tel: + 33 1 5369 7119
- ESA initiating the registration of the legal entity – necessary information : name of a contact point and its emails
- For sub-levels of the legal entities calling ESA **prior to** filling in anything online. ESA will be creating ESABD codes per business areas– necessary information : name of a contact points and its email

Registration process

Services and industrial companies

- The registration is taking place online;
- The questionnaire has to be first filled in and submitted to ESA;
- Once the questionnaire is validated the companies Entity Information Administrators and their deputies will be notified. The emits users will be receiving their user-ids and passwords;
- The Entity Information Administrators, their deputies and the reviewers can access the online questionnaire anytime in order to proceed with updating;

Status of registrations Czech Republic

- 28 questionnaires in preparation by entities
- 22 registered entities (validated questionnaires)
- 21 uncompleted questionnaires (some put in working area by entities)
- 84,62% of the entities covering 90% of the commitments with ESA are registered
- 11 of the top 13 of the entities covering 90% of ESA commitments are registered
